DETAILED ACTION

1. Applicants' Preliminary Amendment, paper#4, is acknowledged. Claims 1-12 and 30-32 have been canceled.
2. Claims 13-29 and 33-49 are pending

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 42-49, drawn to composition comprising a vector, classified in class 435, subclass 320.1.
 - II. Claims 13-29 and 33-40, drawn to method of immunization, classified in class 424, subclass 93.1.
 - III. Claim 41, drawn to method of making a vaccine, classified in class 435, subclass 71.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the vector can be utilized *in vitro* for the production of MOMP to be used in immunoassays for detection of *Chlamydia*.

Inventions I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case,

Art Unit: 1645

the composition can be made by using a nucleotide sequence encoding a MOMP from a source other than *Chlamydia*.

Inventions II and III are patentably distinct methods utilizing different reagents, steps, and having different end results.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, and because while the searches may overlap, the searches are not coextensive, restriction for examination purposes as indicated is proper.

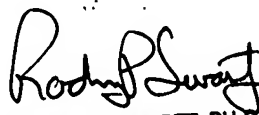

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney P. Swartz, Ph.D., whose telephone number is (703) 308-4244. The examiner can normally be reached on Monday through Thursday from 5:30 AM to 4:00 PM EST.
